SUMMARY

UI/UX Designer with a strong focus on creating intuitive, user-centered web and mobile experiences. Skilled in user research, wireframing, prototyping, and high-fidelity design, with a solid understanding of usability principles, design systems, and responsive design. Proficient in Figma, with working knowledge of HTML, CSS and Bootstrap. Dedicated to enhancing user experience through iterative design, feedback-driven improvements and consistent visual design.

EDUCATION

B.Tech | Poornima College of Engineering 2021-2025
Computer Science & Engineering | 8.70 CGPA

PROFESSIONAL EXPERIENCE

HG Technologies

UI/UX Designer Jan 2026 - Current

- Designed end-to-end user experiences for web and Mobile applications, improving usability and product clarity.
- Created structured user flows, journey maps and high-fidelity UI designs aligned with business requirements.
- Created brand collateral including pens, standees, ID badges, notepads, bottles, and other promotional assets.

Graduate Engineer Trainee July 2025 - Dec 2025

- Supported UI/UX design and frontend development for the project BuildSync.
- Created wireframes, basic user flows, and UI screens.
- Developed and implemented UI for landing page of BuildSync, converting design concepts into responsive frontend layouts.
- Assisted in preparing design assets, proposal decks, and flow diagrams for better project understanding.

H.G. Infra Engineering Ltd. | Intern April 2025 - June 2025

- Designed flowcharts, user journeys and conceptual diagrams to define clear product workflows and navigation.
- Prepared presentation decks and proposal visuals to communicate design ideas effectively to stakeholders.
- Contributed to end-to-end design thinking by assisting in research, flow mapping and UI design execution.

SKILLS

- Design & Creative Tools** - Figma, Adobe Photoshop, Illustrator, Canva, Spline, PowerPoint, Microsoft Word, Microsoft Excel
- Frontend Development** - HTML5, CSS3, Bootstrap
- Visual & Content Design** - Proposal Deck, Landing Pages, Dashboard
- Tools** - Git (Basic), VS Code

PROJECTS

All About Packing (Live - Ongoing)

- Worked on UI/UX design and frontend development for All About Packing, an e-commerce platform for packaging products, creating intuitive interfaces and seamless shopping flows (category browsing, product listing, filtering) using Figma.
- Translated designs into responsive frontend components using HTML, CSS, and modern frameworks, ensuring cross-device consistency and scalability.
- Enhanced usability and overall user experience by improving visual hierarchy, layout structure, and interaction design.

BuildSync (Live)

- Designed end-to-end user flows for RFI processes, material tracking, and machine management, simplifying complex operations (Man, Material, Machine) into intuitive and structured user journeys.
- Improved usability by optimizing navigation, enhancing data visibility, and refining interaction design.
- Collaborated closely with developers to ensure accurate, scalable, and consistent UI implementation across systems.
- Designed responsive user interfaces for web and mobile platforms, ensuring a seamless and cohesive cross-device experience.

InfraForge (Ongoing)

- Designed end-to-end user experiences for InfraForge, a B2B marketplace for buying, selling, and renting construction equipment, creating intuitive user journeys, wireframes, and high-fidelity UI designs (Figma) for product listing, discovery and negotiation flows.
- Developed brand identity and design system (logo, color palette, UI components) and contributed to project proposal deck.
- Collaborated with developers to implement scalable, responsive frontend interfaces, ensuring consistency and seamless experience across web and mobile platforms.
